The free economic zones are developing in Republic of Moldova, and these structures are advancing the investment activity and they especially are based on foreign direct investments. Now, seven free economic zones are functioning in our country and the se zones are situated in the Central part, in the Northen part and in the South part of Republic of Moldova. The free economic zones provide to investors some advantages, that are guaranteed by the state of Republic of Moldova. The results of activity of free economic zones reflect the attraction of capital, the creation of workplaces for population and also income for the salaried personal, the payment of taxes to the state budget. The free economic zones have important perspectives in Republic of Moldova and their plans are directed to vocational training of technical and engineering specialty, development of innovative environment and implementation of innovations in practice activity of industry enterprises.
